

*Note – Chassis ground not shown, apply as you like.
 Also heater CT connection not shown, heater CT wire can go direct to 6P1P cathode pin 8, or virtual CT resistors can be applied direct to the power valve sockets.
 Layout is 3D and some components pass over other components. Refer to the schematic if unsure about connections.

Thrifty TW Tagstrip Layout

This layout is just one option. Feel free to use or abuse as you wish. Grid scale is 5mm and component size and spacing is to scale. Adjust spacing as appropriate for the resistors/caps size and value being used.
